BE IN THE ROOM

Sponsor packages include seats and registration at the invitation-only ELITE Research Symposium. Registration is limited to 100 external participants to facilitate connections.

SHARE YOUR EXPERTISE

Presenters and panelists will be selected from among sponsors and invited registrants. The ELITE Research Symposium is designed to elicit connection and collaboration among current and future thought leaders in military medicine research and innovation.

LEARN HOW RESEARCH & INNOVATION SAVES AND IMPROVE LIVES

Engage with thought leaders and experts aligned with the CU Center for COMBAT Research. We solve the U.S. military's toughest medical challenges by leading high-impact research, education, and innovation in collaboration with government, academic, and industry partners. We aim to turn military medical gains into better health care for all.

SPONSORSHIP PACKAGE PERSONALIZED BENEFITS

Sponsors featured on [ELITE Research Symposium](#) website and all conference materials including company educational content, table displays, and opening slides.

Gold and Platinum sponsors recognized on the CU Center for COMBAT Research social media posts at least 6 times before, during, and after the conference. Our LinkedIn account boasts more than 300K impressions last year, with 750-900 views per post.

Sponsorship packages include seats at the invitation-only event and the chance to be invited to participate as a presenter or panelist.

Each package includes one additional conference promotion that meets your needs, such as sharing company collateral at the event, specific support to reduce registration fees for trainees or active duty participants, named food services/receptions, or other types of acknowledgment. Contact [Professor Anne Libby](#) to discuss your sponsorship goals.

APRIL
03**HIGH IMPACT RESEARCH DAY**

Solve high priority combat-related research gaps and translate gains in military medicine into better health for all.

APRIL
04**INNOVATION DAY**

Collaborate with government, academic, and industry partners to develop and deploy new therapies, devices, and processes.

APRIL
05**SCIENTIFIC TRAINING DAY**

Optional day for active workshops in grantsmanship, study design, and scientific writing. Novice, early career, and established researchers are welcome.

**LOCATION**

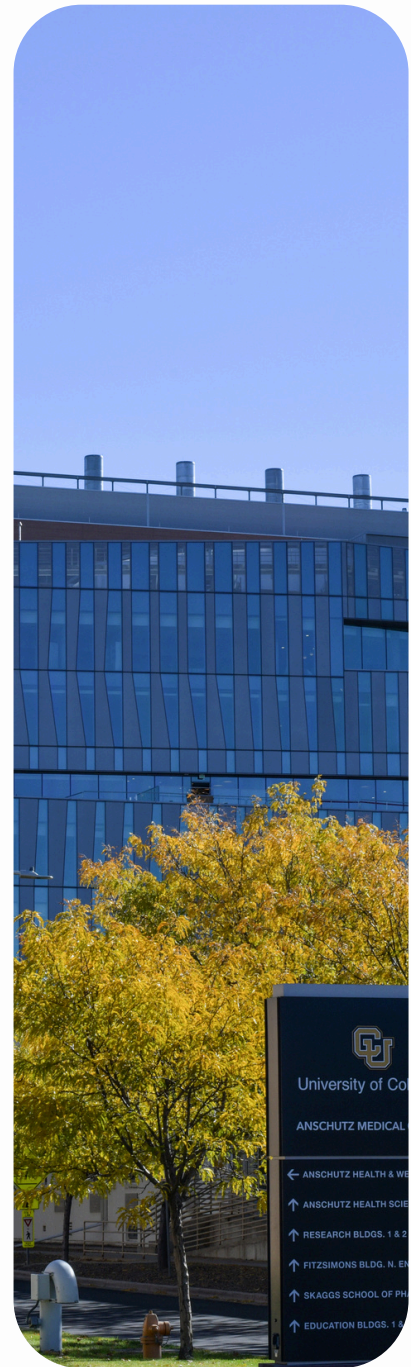

University of Colorado Anschutz
Medical Campus in Aurora, Colorado

The inaugural CU Center for COMBAT Research Symposium is a 2-day in-person invitation-only gathering of academic, government, and industry leaders and learners in military health research and innovation whose work aligns with the Center's aim to save and improve lives on the battlefield and at home.

The 2025 program will focus on high impact health research and health care innovation, with scientific presentations and keynote lectures. Optional post-conference research skills training will be offered.

Invitations will be sent to major collaborators and institutional partners with guidance to invite their colleagues who are active duty scientists, early career, novice, or established researchers, or thought leaders.

CU CENTER FOR COMBAT RESEARCH

100+

Investigators

70+

Funded Projects

50+

*Government,
Academic &
Industry Partners*

The Center for COMBAT Research aims to turn military medical gains into better health care for all. We facilitate the execution of combat and deployment-related medical research by navigating successful relationships with military scientists, clinical investigators, military leaders, and industry to produce successful innovations, material solutions, and high impact knowledge products. Our team leverages over 100 years of combined military experience to address current military medicine research gaps and translate solutions to our local civilian communities.

The Center for COMBAT Research recognizes the importance of education and mentorship in advancing the next generation of military physicians and researchers. We recruit, train, and mentor physicians and researchers across the pipeline from students in our COMBAT Research scholar program, to active duty residents and fellows, to established investigators and mentors.

Through research, education, and collaboration, we are driven to solve the U.S. military's toughest medical challenges.
